

JSON file template

Take a look at our example of an .json file:

```
{
  "phrases": [
    {"string": "WeekendPlaner",},
    {"string": "Settings",},
    {"string": "Open",},
    {"string": "Register",},
    {"string": "code",},
    {"string": "Choose file",},
    {"string": "Firstname",},
    {"string": "Phone number",},
    {"string": "Lastname",},
    {"string": "Button",}
  ]
}
```

Please place you'r phrases in a „phrases” node and inside that place every phrase with the string key.

After translation when you download you'r file the translated phrases will be at the bottom of the file in a TranslatedPhrases node and inside that every translated phrase with the TranslatedPhrase key
